

Add Taxand as an employer to your profile, as well as your current firm.

Did you know you can list multiple current roles on your LinkedIn profile? Adding Taxand Global to your experience and linking to the global profile page enhances your visibility and global presence, while still clearly reflecting your principal role within your member firm.

Here's how:

- Go to your profile and scroll to the Experience section.
- Click the (+) icon and select "Add position."
- Title: Use something that reflects your global role (e.g., Tax Partner | Taxand Global or International Tax Specialist).
- Employment Type: For example, "Full-time" depending on your local arrangement.
- Company Name: Type "Taxand" and ensure you select the official "Taxand" Global page from the dropdown menu. This ensures the Taxand logo appears on your profile.
- Start Date: Set this to when you joined the firm.
- Current Role: Ensure the box "I am currently working in this role" is checked.
- Description: Briefly mention your involvement in global service lines or international projects.

If you haven't already, ensure your local firm (e.g., Arsene Taxand, Garrigues, etc.) is also listed as a "Current" position using the same steps above.

Reorder Them (If Necessary)

LinkedIn usually displays your most recent "Current" role at the top. If you want your local firm to show first:

- Hover over the Experience section on your profile.
- Click and hold the reorder icon (three horizontal lines) on the right side of the entry.
- Drag and drop the entries into your preferred order.

For further tips and guidance on posting global content and supporting the Taxand brand on LinkedIn and other social media, take a look at our **Taxand Social Media Advocacy Guidelines** on the Hub.
